Design Build: New NY Bridge

Join the DBIA Upstate NY Chapter for breakfast as they review the biggest design build project in New York State. Come hear from the Production Manager!

January 30th, 2018
7:00 AM - Registration
7:30 AM - Breakfast
8:00 AM - 10:30 AM Presentation
Full breakfast included
Hilton Garden Inn Downtown
$35 per person

OFFICERS:

PRESIDENT: PAT ROGERS
THE PIKE COMPANY

VICE PRESIDENT: KEVIN CANNAN
AAC CONTRACTING, INC.

TREASURER: LINDSAY THAINE
THE BONADIO GROUP

SECRETARY: STEVE RUETHER
THE BELL COMPANY

BOARD MEMBERS:

RON MAIER
KENRON INDUSTRIAL, AIR CONDITIONING, INC.

KEVIN PEARTREE
ERNSTROM & DRESTE

MARK SHORTINO
RADEC CORPORATION

DAVE BEINETTI
SWBR

Robert Allen, PE
Production Manager
HDR

Hear from HDR’s Robert Allen, production manager for the Bridge Project. This presentation describes the project scope, environmental constraints, innovative design and ongoing construction progress, with special focus on design-build delivery techniques.

The New NY Bridge to Replace the Tappan Zee

The New NY Bridge project is delivering two 3.1-mile-long, parallel bridges to replace the existing Tappan Zee Bridge, carrying the New York State Thruway (I-87/I-287) across the Hudson River between Tarrytown and South Nyack, NY. Tappan Zee Constructors, LLC (TZC) – a consortium including Fluor Enterprises, American Bridge Company, Granite Construction Northeast, and Traylor Bros – with HDR as the lead designer was contracted as the design-builder for this $3.9 billion project. This presentation describes the project scope, environmental constraints, innovative design and ongoing construction progress, with special focus on design-build delivery techniques.

Robert Allen Biography

Robert Allen served as HDR’s Production Manager for the New NY Bridge project where he was responsible for delivering over 7,000 design drawings in just 18 months from a design team of 30 firms and over 300 full time staff. Robert has more than 15 years of experience in design and construction project management across several infrastructure mega-projects throughout North America. Most recently serving as the Design Project Manager for the Pennsylvania Department of Transportation Rapid Bridge Replacement Program, Allen has been responsible for the daily design operations and a team of over 300 engineers per week working to deliver the design for the 558 bridge sites across the state of Pennsylvania.

He holds a BS in civil engineering from the University of Iowa and is a registered professional engineer in four states and two countries. He has been a leader in HDR’s implementation of BIM for transportation projects. In 2014 he was chosen by Engineering News-Record New York among the “Top 20 under 40” in the New York AEC industry.
